

Secure Payment Integration for Oracle[®]

Secure Electronic Payment Acceptance for E-Business Suite

Paymetric provides a secure payment integration for Oracle[®] E-Business Suite that enables merchants to automate electronic payment acceptance across one unified platform. Our pre-built integrations streamline the acceptance of all electronic payments methods and apply them against sales orders, accounting documents, service contracts and invoices in Oracle. Transactions originating from other systems and applications such as eCommerce, electronic bill, CRM or legacy order-entry, can be authorized, secured and settled within the Oracle E-Business Suite. Paymetric integrations ensure PCI compliance and provide unmatched security

Payment Acceptance

Accepting credit cards, eChecks and other electronic payment methods within existing Oracle E-Business Suite, Sales Cloud, Commerce, iStore, POS or legacy order entry systems is now simple and streamlined. The Paymetric integration for Oracle enables merchants to securely automate transactions from Oracle E-Business Suite directly to payment processors, acquirers, PSPs and other payment solutions without the manual processes or the upfront expense of purchasing and maintaining additional hardware or software.

Paymetric seamlessly integrates electronic payment transactions across the global enterprise from Oracle and other source systems, then securely transmits them to the cloud platform for authorization and settlement. Paymetric facilitates payment acceptance from credit and debit cards, eChecks/ACH and other payment types such as PayPal and BillMe Later. The Paymetric integration for Oracle supports in-country payment methods, enables fraud scoring and provides full reporting services.

Validated Integration

Oracle E-Business Suite

BENEFITS:

Integrates with Oracle E-Business Suite to reduce manual processes

Reduces PCI DSS audit scope

Features proprietary tokenization for secure payments

Lowers payment processing costs

Unifies onto one platform the acceptance of all electronic payment methods globally through one or many connections to your preferred processor(s)

Supports B2B and B2C transactions

Requires no additional hardware

Speeds implementation, reduces time to market

Data Security and PCI Compliance

Paymetric's award-winning tokenization solution, prevents data from entering Oracle E-Business Suite, which reduces PCI DSS audit scope and mitigates risk of exposing sensitive data in the event of a breach. Merchants have the option to use our data intercept solution, to capture and tokenize card numbers outside of Oracle and other systems. By tokenizing the data prior to it entering the enterprise, merchants can drastically reduce PCI DSS audit scope and mitigate the risk of exposing sensitive data in the event of a breach.

Interchange Optimization

Paymetric's Interchange Optimization solution for Oracle® enables merchants to reduce TCO of payment processing with up to a 1% reduction of interchange fees. Merchants face increased customer demand to reduce card processing fees and provide line-item transaction detail for billing, payment, disputes and reconciliation. Level III data includes expanded details on the goods or services being purchased. Paymetric enables transmission of the Level II/III data from any enterprise payment acceptance system to the merchant's payment processor. Because the card associations incentivize merchants for providing enhanced data, companies that provide Level II/III transaction details can experience a significant reduction in interchange rates.

- Paymetric securely transmits payment transactions originating across the enterprise, from Oracle and other source systems, for authorization and settlement.

About Paymetric

Paymetric, Inc. is the standard in secure, integrated payments. Our innovative payment acceptance solutions expedite and secure the order-to-cash process, improve ePayment acceptance rates and reduce the scope and financial burden of PCI compliance. Leading global brands rely on Paymetric for the only fully integrated, processor-agnostic tokenization solution, supported by dedicated customer service. Paymetric is a nationally award-winning industry leader recognized for continual innovation and world-class support. For more information, visit paymetric.com.
