

Secure Payment Acceptance Integration for SAP[®]

Single Platform for all Payment Acceptance and Data Security

Paymetric, a SAP Certified Partner, provides integrated cloud solutions to secure and streamline payment acceptance in the SAP enterprise environment. Merchants can automate electronic payment acceptance across one unified platform with Paymetric solutions. They are PCI compliant, processor-neutral and feature patented tokenization technology for open integration and data security.

Payment Acceptance

Paymetric seamlessly integrates electronic payment transactions across the global enterprise from SAP and other source systems, then securely transmits them to the cloud platform for authorization and settlement. Paymetric facilitates payment acceptance from credit and debit cards, eChecks/ACH and other electronic payment types such as PayPal and BillMe Later. Our solutions support in-country payment methods, enable fraud scoring and include full reporting services.

The Paymetric integration for SAP enables merchants to securely automate transactions within SAP directly to payment processors, acquirers, PSPs and other payment solutions without the manual processes or the upfront expense of purchasing and maintaining additional hardware or software.

Data Security and PCI Compliance

Security breaches can inflict extensive, long term financial and brand damage upon an organization. Our data security solutions are uniquely designed to protect personal information and keep valued organizations' reputations intact.

Paymetric provides a portfolio of enterprise data security solutions featuring patented tokenization technology to safeguard customer data while simplifying PCI compliance. Our solutions enable merchants to securely accept payments in the SAP environment using tokenization to replace the credit card numbers with random tokens before they enter the enterprise. The approach effectively keeps raw card data from enterprise systems to reduce PCI scope and save PCI audit costs.

BENEFITS:

Streamlines SAP payment processing

Lowers operational expenses with cloud delivery

Offers PCI compliance to reduce PCI audit scope

Reduces Interchange costs with optimization

Lowers payment processing costs

Supports B2B and B2C transactions

Requires no additional hardware

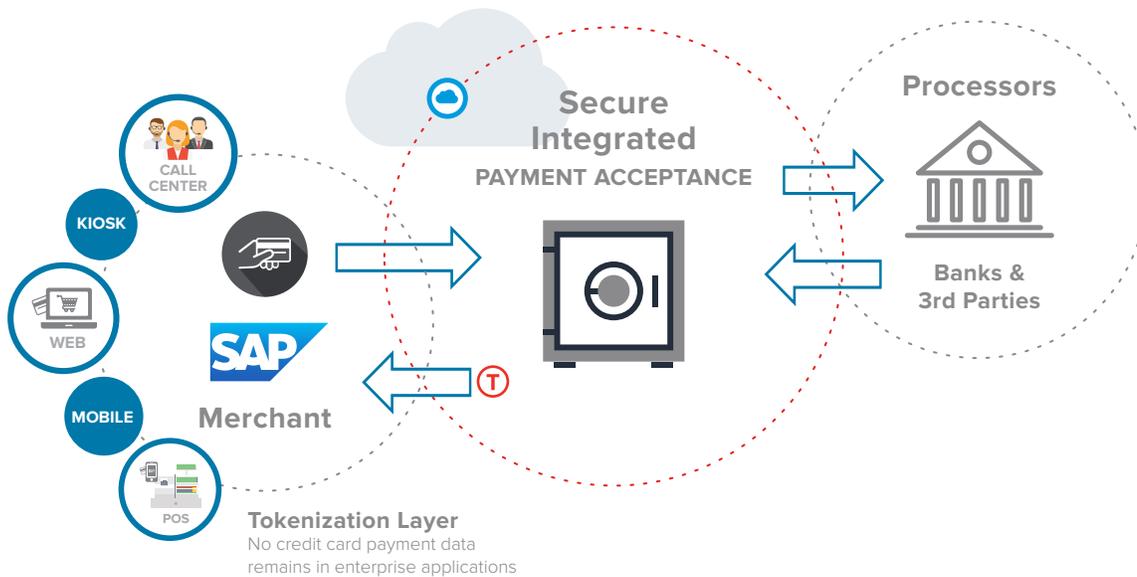

Speeds implementation, reduces time to market

Paymetric also provides a solution to protect personally identifiable information (PII) such as Social Security numbers, bank account information, customer master records and unique IDs. PII is a prime target for security hackers and protecting this information is often minimized by organizations. Paymetric effectively protects PII by securely intercepting, transferring and storing the sensitive data.

Interchange Optimization

Paymetric's Interchange Optimization solution for SAP enables merchants to reduce TCO of payment processing with up to a 1% reduction of interchange fees. Merchants face increased customer demand to reduce card processing fees and provide line-item transaction detail for billing, payment, disputes and reconciliation. Level III data includes expanded details on the goods or services being purchased. Paymetric enables transmission of the Level II/III data from any enterprise payment acceptance system to the merchant's payment processor. Because the card associations incentivize merchants for providing enhanced data, companies that provide Level II/III transaction details can experience a significant reduction in interchange rates.

- **Paymetric securely transmits payment transactions originating across the enterprise, from SAP and other source systems, for authorization and settlement.**

About Paymetric

Paymetric, Inc. is the standard in secure, integrated payments. Our innovative payment acceptance solutions expedite and secure the order-to-cash process, improve ePayment acceptance rates and reduce the scope and financial burden of PCI compliance. Leading global brands rely on Paymetric for the only fully integrated, processor-agnostic tokenization solution, supported by dedicated customer service. Paymetric is a nationally award-winning industry leader recognized for continual innovation and world-class support. For more information, visit paymetric.com.
