

# Security Manager

Stay ahead of exposure threats and system vulnerabilities.

Let's face it. Humans make mistakes. You may have done your due diligence to secure data fields that collect credit card numbers by implementing a tokenization solution, but what happens when that card data is entered improperly into an incorrect data field that is not protected by tokenization?

Raw credit card data can easily be entered in error by customer service reps into the cardholder name field or purchase order number field. This can result in leaving your environment at an increased risk for data breaches and you may experience compliance challenges.

**The average organizational cost per data breach was \$5.5 million in 2012.<sup>1</sup>**

XiAlert™ Security Manager enables organization to identify unsecured credit card data before it's exploited or at risk of a data breach. It monitors transmission of erroneous card data and delivers detailed notifications via email, allowing organizations to take a more proactive approach to security.

Spend less time researching errors and more time proactively monitoring network security with Paymetric's XiAlert Security Manager. Already a Paymetric customer? Contact your Account Manager to add XiAlert to your account today.

## How Does It Work?

- Improper credit card data is entered into an incorrect data field in client environment by human or system and transmitted to Paymetric
- Exposed card number data detected by Paymetric's XiAlert Security Manager
- XiAlert Security Manager proactively alerts customer of exposed card data and the fields affected
- Client utilizes notification data to efficiently locate and remove exposed credit card number from internal systems
- Duplicate erroneous data set is automatically removed from the Paymetric SaaS environment
- Continuous vulnerability scans provided to customer via the XiAlert Security Manager

## About Paymetric

Paymetric, Inc. is the standard in secure, integrated payments. Our innovative payment acceptance solutions expedite and secure the order-to-cash process, improve ePayment acceptance rates, and reduce the scope and financial burden of PCI compliance. Leading global brands rely on Paymetric for the only fully integrated, processor-agnostic tokenization solution, supported by dedicated customer service. Paymetric is a nationally award-winning industry leader recognized for continual innovation, SAP partnership and world-class support since 1998.
