

## P2PE Intercept Solution

Keeps sensitive cardholder data from entering your call center and dramatically reduces PCI scope and costs.

### Immediately Tokenize at the Fringe

If your organization handles, processes or stores sensitive cardholder data in your call center, you are required to comply with the Payment Card Industry Data Security Standards (PCI DSS). With data breaches and fraudulent activity continuing to rise, companies that store cardholder data onsite are particularly vulnerable.

**The average cost of cyber crime to a company is \$12.7 million, which is up 9% from last year's 11.6 estimate.**

XiIntercept™ P2PE from Paymetric pushes sensitive cardholder data even further away from your core systems by tokenizing it at the call center pin pad. It boosts network safety by applying the highest level of protection—keeping network and PCs out of PCI scope and giving you greater protection from data breach. Paymetric P2PE integrates with enterprise systems including SAP, Oracle, AS400 and other enterprise systems.

#### Work flow:

- Call Center: Enter number into pin pad
- Pin pad encryption of card number
- Paymetric data center tokenization
- Return token to call center

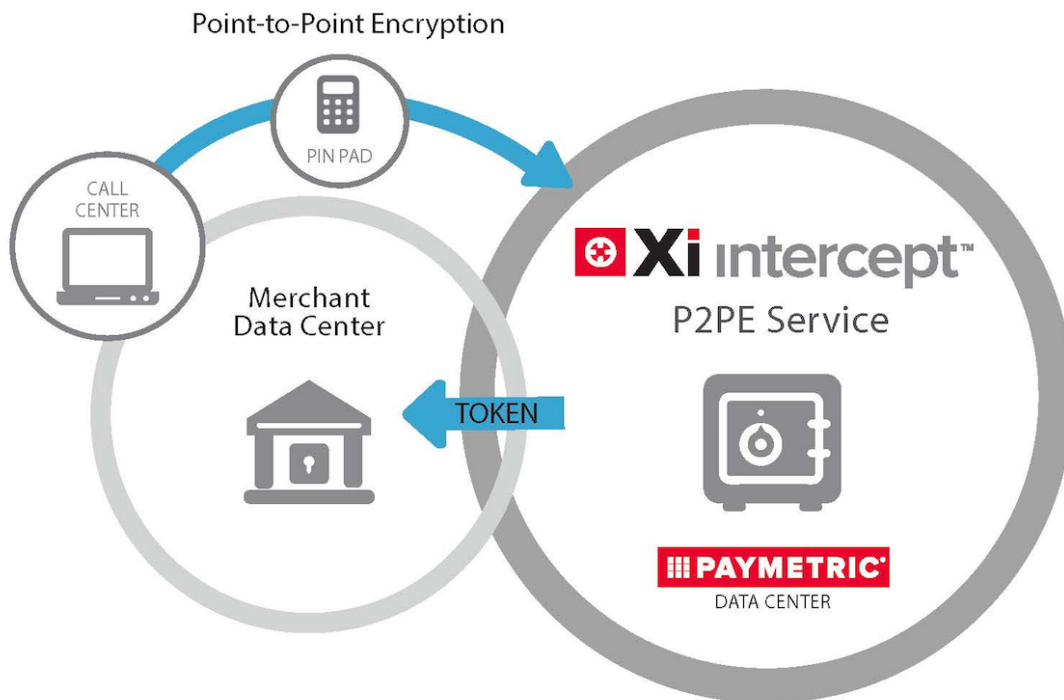

**Take a holistic approach to security by leveraging P2PE and tokenization to eliminate call center workstations and keyboards from PCI scope.**

### Benefits

- Removes call center workstations, virtual terminals and keyboards from your PCI DSS CDE
- Simplifies annual PCI DSS audit
- Reduces the risk and cost associated with a data breach
- Replaces credit card numbers with tokens, rendering the data useless to thieves
- Maintains full integration with call center systems and applications

# P2PE Intercept Solution

Keeps sensitive cardholder data from entering your call center and dramatically reduces PCI scope and costs.

## About Paymetric

Paymetric, Inc. is the standard in secure, integrated payments. Our innovative payment acceptance solutions expedite and secure the order-to-cash process, improve ePayment acceptance rates and reduce the scope and financial burden of PCI compliance. Leading global brands rely on Paymetric for the only fully integrated, processor-agnostic tokenization solution, supported by dedicated customer service. Paymetric is a nationally award-winning industry leader recognized for continual innovation, SAP partnership and world-class support.
