

# Card Acceptance

Secure, integrated credit card and electronic check acceptance throughout your global enterprise.

Processing electronic payments outside of your standard workflows for order-to-cash, accounts receivable and collections means risking:

- Slower processes with increased manual entry errors
- Delivering goods without securing funds
- Reconciliation headaches
- Elevated and excessive interchange fees
- PCI DSS compliance and data security challenges
- Dissatisfied customers

Leading businesses seek an efficient, seamlessly integrated, safe and affordable way to accept credit cards, eChecks and other electronic payment methods within existing enterprise systems like an ERP, CRM, web application, POS or legacy order entry system in order to automate payment acceptance for sales orders and invoices.

XiPay<sup>®</sup> On-demand is a SaaS (Software-as-a-Service)-based, multi-tenant platform developed and supported by Paymetric. It facilitates credit and debit card acceptance, process eChecks/ACH payments, support alternative payment types like PayPal or BillMe Later, offer in-country payment methods and enable fraud scoring and reporting services.

The cost-effective XiPay On-demand platform enables your company to fully integrate and secure electronic payment transactions from your enterprise systems directly to payment processors, acquirers, PSPs and other payment solutions without the upfront expense of purchasing and maintaining additional hardware and software.

## How Does It Work?

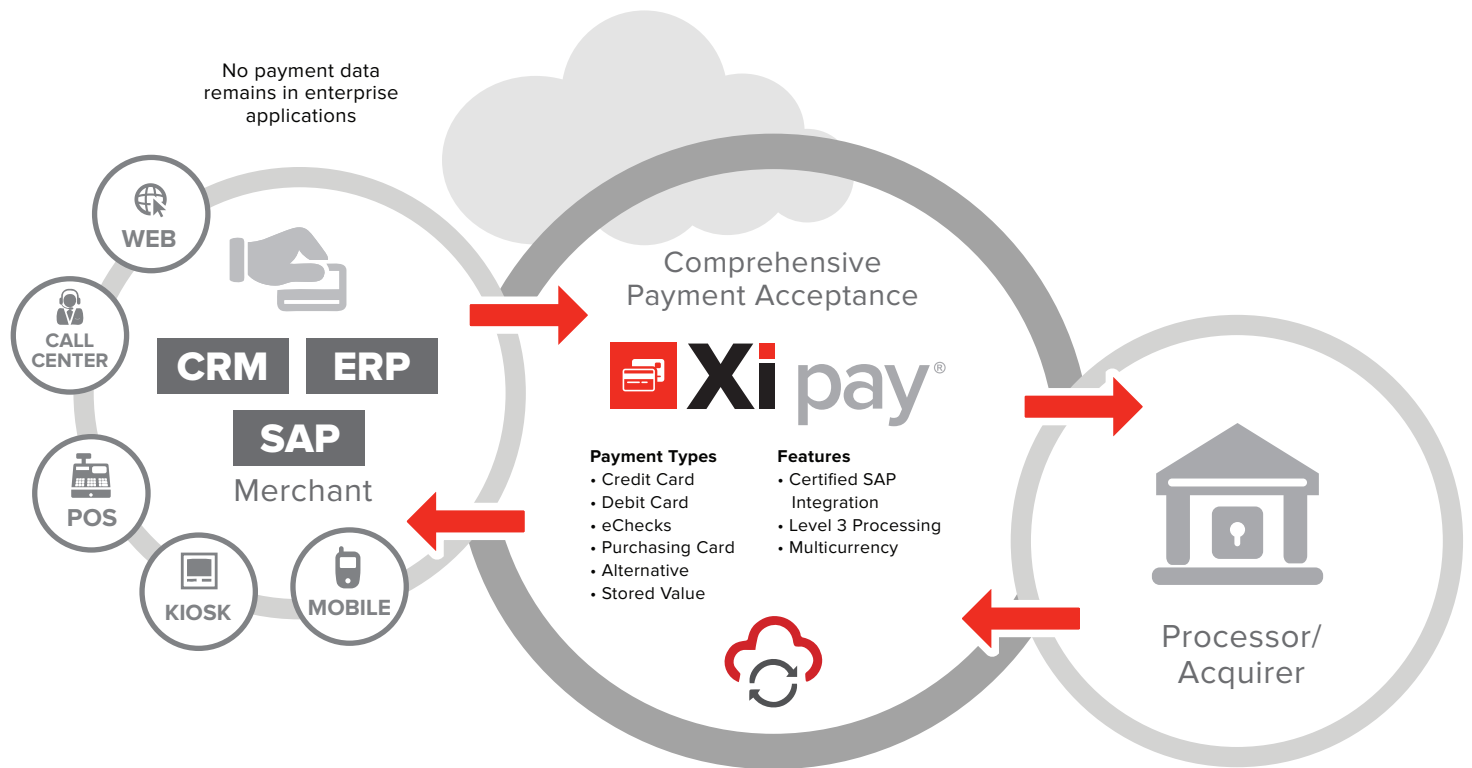

Electronic payment transactions originating from any enterprise system, anywhere around the globe, are securely transmitted to Paymetric's SaaS-based XiPay On-demand platform, for authorization and settlement. Behind the scenes, Paymetric works with merchants like you to ensure payment transactions are tightly and securely integrated with system workflows that support order-to-cash and collections processes, giving merchants end-to-end automation.

## Features

- Level 1 PCI DSS Service Provider certified
- No additional hardware required
- Solutions are developed and supported by Paymetric
- Proven SaaS, multi-tenant solution facilitating \$30B+ in transaction volume annually for the world's most respected brands
- On-going maintenance is not the merchant's responsibility
- Support for B2B and B2C transactions
- Monthly, fee-based service with no upfront license fee/capital expense

## Benefits

- Securely leverage one platform for the acceptance of all ePayment methods, globally – through one or many connections
- Reduce TCO by accepting credit cards and eChecks as forms of payment
- Eliminate manual processes and reconciliation challenges
- Lessen scope and financial burden of achieving PCI DSS compliance

## About Paymetric

Paymetric, Inc. is the standard in secure, integrated payments. Our innovative payment acceptance solutions expedite and secure the order-to-cash process, improve ePayment acceptance rates, and reduce the scope and financial burden of PCI compliance. Leading global brands rely on Paymetric for the only fully integrated, processor-agnostic tokenization solution, supported by dedicated customer service. Paymetric is a nationally award-winning industry leader recognized for continual innovation, SAP partnership and world-class support since 1998.
