

Fraud Management

Securely integrate fraud management and PCI compliance protection without exposing sensitive credit card numbers.

Online payment fraud costs businesses billions of dollars each year, not just in fraud loss, but in administrative overhead as well. With the explosion in eCommerce transactions comes a corresponding rise in fraudulent transactions.

**Merchants pay \$200 billion to \$250 billion
in fraud loss annually.¹**

Fraud Management technology delivers a valuable tool to help minimize this expense. However, providing raw credit card numbers in order to utilize these services opens up a new set of risk and compliance concerns.

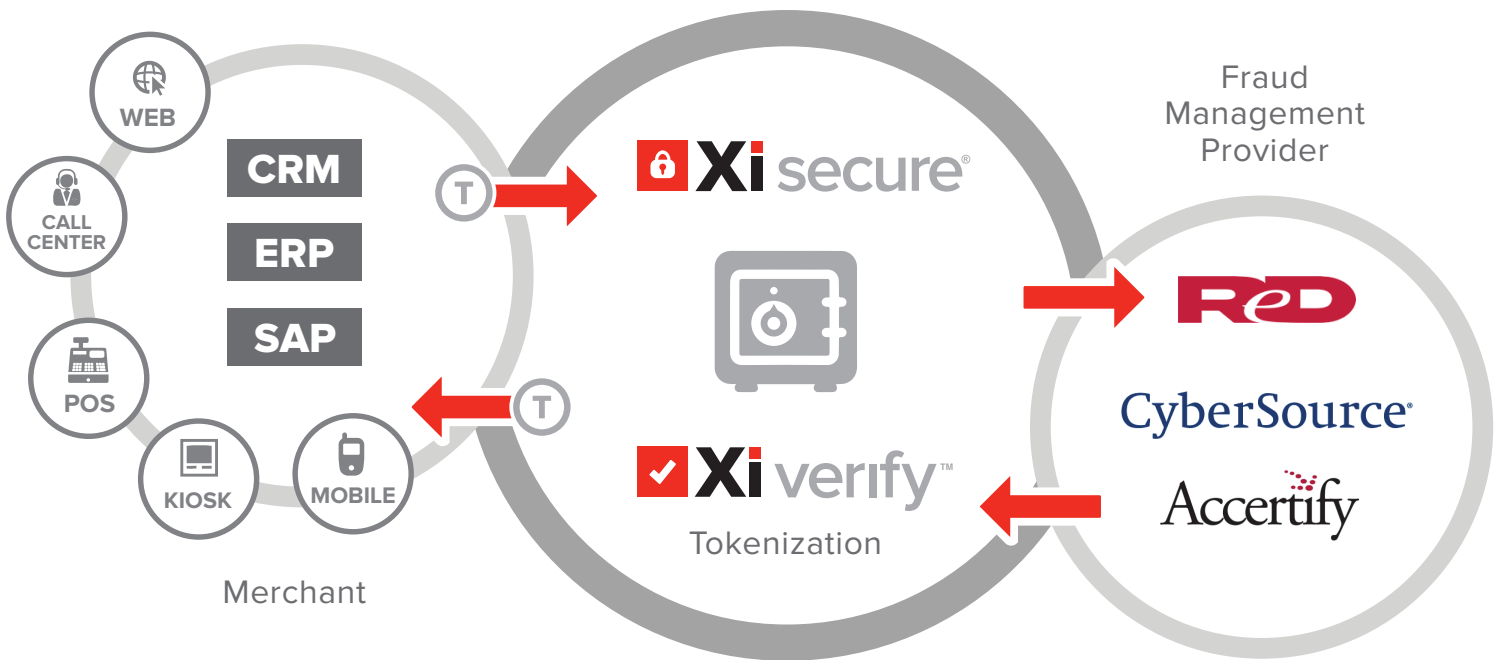

For merchants looking to expand their online business and to those merchants who, to-date, have managed fraud prevention in-house, there is now a solution for fraud prevention from Paymetric – XiVerify™.

Paymetric has partnered with the three leading Card-Not-Present (CNP) Fraud Management solution providers to bring our clients XiVerify, a fully secure and integrated solution. XiVerify allows merchants to select their Fraud Management solution provider of choice and then customize the services of that solution provider to meet their needs, all while leveraging Paymetric's tokenization technology to protect sensitive credit card numbers.

Benefits

- Maximize revenues through improved detection rates and fewer chargebacks and false positives
- Simplify and combine all fraud prevention processes and procedures
- Securely integrate fraud without exposing raw credit card data in the merchant environment
- Automate manual processes and drive down administrative, personnel and IT costs
